Energy lives here™

Special Visit From Harris County Commissioner Adrian Garcia

On Wednesday, January 27, the ExxonMobil Pipeline team enjoyed a special visit from Harris County Precinct 2 Commissioner Adrian Garcia at our Alexander Island project site. We appreciate Commissioner Garcia's support of safe and responsible investments in energy infrastructure projects in Harris County.

Ship Channel Pipeline Crossing Safely Completed

ExxonMobil Pipeline Company completed the process of installing two new pipelines under the Houston Ship Channel. The work took place between an unincorporated industrial area of East Harris County and Bayway Dr. in Baytown. Safety was the main priority as work was being conducted. To learn more about the process, refer to our [Horizontal Directional Drilling fact sheet](https://harris.exxonmobilpipeline.com/resources.aspx) at harris.exxonmobilpipeline.com/resources.aspx.

The two-ton reamer that cleared the pipeline path dozens of feet below the Ship Channel.

A crew in La Porte working on weld tie-ins.

Morning "all hands" meeting where workers receive daily safety information prior to starting any work on the project.

Community Spotlights: ExxonMobil Gives Back

ExxonMobil Pipeline Company supports local first responders, civic organizations and other non-profits through our Good Neighbor Grant program. This program provides funds to local tax-exempt organizations to support their community programs, educational initiatives and environmental projects.

In 2020, the company provided grants to 16 organizations throughout Harris County, including the City of Baytown. We encourage all eligible organizations in the area to learn more about our Good Neighbor Grant opportunities by contacting public.awareness@exxonmobil.com.

Additionally, ExxonMobil Pipeline's support extends beyond financial contributions. We donated 800 gallons of hand sanitizer to communities throughout Texas including the City of Baytown, extended STEM programming to teachers and students from 35 schools and educational centers in Harris County, and offered pipeline emergency training at Texas A&M's world-renowned TEEX facility to firefighters from the area.

As 2021 continues, ExxonMobil Pipeline remains committed to supporting our local communities, progressing educational opportunities for students and serving as a recourse for emergency response personnel.

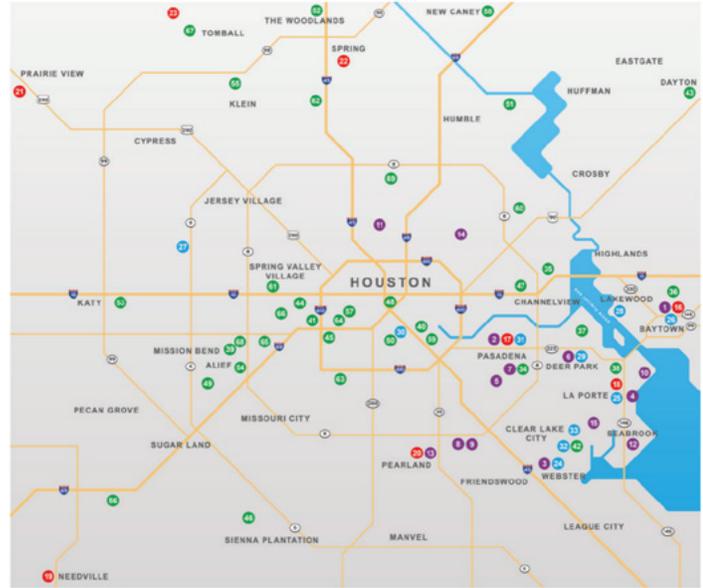

Working Closely With Our Neighbors

Whenever we set out to conduct project work in or near a community, ExxonMobil Pipeline Company tries to reach out and establish two-way communications with nearby residents, businesses, schools and other community facilities. This helps us explain the benefits of the work we are doing as well as what to expect — such as our crews' parking, digging and/or storing equipment in the area.

Getting to know more about our neighbors also helps us figure out how we can minimize the impact of our work as much as possible. And having our neighbors know more about the projects can help maintain safety, which is always our number one priority.

We appreciate the cooperation of the school administrators and families as we work to safely complete our work without interrupting regular school activities.

We appreciate the cooperation of St. James House staff and residents during construction.

Project Benefits: A Well-Fed Crew is Good Business for Four Corners BBQ

Pipeline projects have many economic and safety benefits that can be hard to explain, but others are pretty obvious, like the regular line of ExxonMobil Pipeline Company workers waiting to enjoy Baytown's own Four Corners BBQ. Open Tuesday through Saturday, Donald Pregeant's BBQ restaurant is so close to the work area that it became a popular spot for our hungry field workers to refuel. They raved about the brisket, ribs and pulled pork, and always looked forward to Tuesday's special of broccoli cheddar casserole.

.....

"We've been in business for 15 years and have been blessed to stay open during the pandemic, not only serving our community but the ExxonMobil Pipeline Company workers. We appreciate their continued support."

Safety Highlight: First Responder Trainings

ExxonMobil Pipeline Company worked with the Texas A&M Engineering Extension Service (TEEX) to develop specialized firefighter training designed to teach them the techniques that help manage pipeline and terminal facility emergencies. The company also funds the tuition and expenses for firefighters who attend. To date, ExxonMobil has provided training to more than 250 firefighters. Emergency responders from Harris County can learn more about the remaining sessions in October and December 2021 by contacting public.awareness@exxonmobil.com.

.....

ExxonMobil Pipeline Company to date has hosted over 250 firefighters and has funded the TEEX training for additional firefighters to enroll in 2021.
