

# ExxonMobil Pipeline Company – East Harris County

Energy lives here™

## Engaging with our neighbors

This inaugural ExxonMobil Pipeline Company East Harris County newsletter is part of our ongoing efforts to increase communications with our neighbors. To view the following newsletter in Spanish please visit [www.baytown.exxonmobilpipeline.com](http://www.baytown.exxonmobilpipeline.com).

We will provide this newsletter about every three months. However, if you have any questions or concerns in the meantime, feel free to contact us at [public.awareness@exxonmobil.com](mailto:public.awareness@exxonmobil.com) or by using the additional contact information found at the bottom of this newsletter.

Finally, if you have any neighbors who wish to receive future newsletters, please encourage them to sign up at [www.baytown.exxonmobilpipeline.com](http://www.baytown.exxonmobilpipeline.com).

## Project update

One of our major upcoming pipeline projects will be kicking off in the Baytown area. The eight-mile pipeline route stretches between ExxonMobil's Baytown refinery and the Moore Road junction near the southeast intersection of Beltway 8 and Highway 90. This project will provide service replacement for an existing pipeline that delivers crude oil to the ExxonMobil Baytown refinery.

We will continue to work closely with our neighbors along this route throughout the construction of the pipeline. Although we have operated multiple pipelines in these locations for many years, we recognize that this is significant work, and we appreciate the patience and support that our neighbors have shown to our personnel and contract crews during pre-construction and early project work.

For additional information about the project please visit: [www.baytown.exxonmobilpipeline.com](http://www.baytown.exxonmobilpipeline.com)

# Meet Community Engagement Lead, Justin Stegall

ExxonMobil Pipeline Company operates and manages pipelines, facilities and projects across the United States in a diverse set of communities – each with their own unique history, people and stories. Justin Stegall, our East Texas community engagement lead, spends a lot of time getting to know our neighbors in the greater Houston area and better understanding their needs and concerns. Justin also works with the development and planning teams, construction crews, utility workers, city officials, school administrators, first responders and wildlife management officials in the area.

On the rare occasion when a neighbor raises an issue about our pipeline work, Justin is one of the first team members to respond, working closely with relevant technical experts or construction leads to reach a resolution that makes our neighbor happy and keeps the project on schedule. We realize and appreciate that, at the end of the day, we cannot do this work without the support of our neighbors.

If you have any questions, contact Justin at [justin.stegall@exxonmobil.com](mailto:justin.stegall@exxonmobil.com).

Pictured Left to Right: Community Engagement Lead Justin Stegall, Mayor Brandon Capetillo, and Project Manager Rick Dixon along the ExxonMobil Pipeline corridor.

I appreciate all that ExxonMobil is doing to minimize impacts, ensure accountability and effectively communicate with the City and our neighbors along the corridor.”

- Mayor Brandon Capetillo

“I really enjoy meeting new people, learning their experiences and working together to cultivate new ideas that make the neighborhoods better.”

- Community Engagement Lead Justin Stegall

With Project Manager Rick Dixon

**Q** How is the project team mitigating impacts to the Baytown community?

**A** “The team has taken key factors into consideration to make sure that we are acting as a good neighbor during construction. One way we are doing so is by lessening potential road impacts through techniques such as bores and horizontal directional drills. We will also be providing busses for our crews to limit the amount of cars driving through the area.”

**Do you have a question for Rick?**
