## Project Updates

Energy lives here™

### Special Visit From Harris County Commissioner Adrian Garcia

On Wednesday, January 27, the ExxonMobil Pipeline team enjoyed a special visit from Harris County Precinct 2 Commissioner Adrian Garcia at our Alexander Island project site. We appreciate Commissioner Garcia's support of safe and responsible investments in energy infrastructure projects in Harris County.

### Ship Channel Pipeline Crossing Safely Completed

ExxonMobil Pipeline Company completed the process of installing two new pipelines under the Houston Ship Channel. The work took place between an unincorporated industrial area of East Harris County and Bayway Dr. in Baytown. Safety was the main priority as work was being conducted. To learn more about the process, refer to our [Horizontal Directional Drilling fact sheet](https://harris.exxonmobilpipeline.com/resources.aspx) at [harris.exxonmobilpipeline.com/resources.aspx](https://harris.exxonmobilpipeline.com/resources.aspx).

The two-ton reamer that cleared the pipeline path dozens of feet below the Ship Channel.

Morning "all hands" meeting where workers receive daily safety information prior to starting any work on the project.

# Community Spotlights: ExxonMobil Gives Back

ExxonMobil Pipeline Company supports local first responders, civic organizations and other non-profits through our Good Neighbor Grant program. This program provides funds to local tax-exempt organizations to support their community programs, educational initiatives and environmental projects.

In 2020, the company provided grants to 16 organizations throughout Harris County, including the City of Webster. We encourage all eligible organizations in the area to learn more about our Good Neighbor Grant opportunities by contacting [public.awareness@exxonmobil.com](mailto:public.awareness@exxonmobil.com).

Additionally, ExxonMobil Pipeline's support extends beyond financial contributions. We donated 800 gallons of hand sanitizer to communities throughout Texas including the City of Webster, extended STEM programming to teachers and students from 35 schools and educational centers in Harris County, and offered pipeline emergency training at Texas A&M's world-renowned TEEX facility to firefighters from the area.

As 2021 continues, ExxonMobil Pipeline remains committed to supporting our local communities, progressing educational opportunities for students and serving as a recourse for emergency response personnel.

In 2020, grants totaling more than \$113,000 were awarded to 16 organizations throughout Harris County, including one to the City of Webster.

## Scrap Donations Support Future Welders

Because welding is a specialized trade in pipeline work, ExxonMobil Pipeline Company is always looking for opportunities to support students who choose to pursue this career. Recently, we donated excess pipe segments from a nearby project to La Porte High School's Career and Technical Education Program. Student welders will now be able to practice their trade on several tons of specialized steel.

## Safety Highlight: ExxonMobil Pipeline Company Continues Sponsoring First Responder Trainings

ExxonMobil Pipeline Company worked with the Texas A&M Engineering Extension Service (TEEX) to develop specialized firefighter training designed to teach them the techniques that help manage pipeline and terminal facility emergencies. The company also funds the tuition and expenses for firefighters who attend. To date, ExxonMobil has provided training to more than 250 firefighters. Emergency responders from Harris County can learn more about the remaining sessions in October and December 2021 by contacting [public.awareness@exxonmobil.com](mailto:public.awareness@exxonmobil.com).

---

ExxonMobil Pipeline Company to date has hosted over 250 firefighters and has funded the TEEX training for additional firefighters to enroll in 2021.
